Sampaloc, Manila, Philippines | +63 9508511195 | eljilizenn@gmail.com | [LinkedIn](#)

SUMMARY

Fourth-year BS Information Technology student specializing in Web and Mobile Development, with a strong foundation in frontend development, UI/UX design, and full-stack web technologies. Experienced in React, TypeScript, JavaScript, and Laravel, with growing experience across database management and collaborative development workflows using Git/GitHub. Motivated by a genuine interest in understanding systems end-to-end and committed to continuous growth as a developer.

EDUCATION

University of Santo Tomas, College of Information and Computing Sciences — Manila, Philippines

Bachelor of Science in Information Technology (Major in Web and Mobile Development), Aug 2023 – Jun 2027

Dean's Lister—A.Y. 2023–2024 (2nd), A.Y. 2024–2025 (2nd), A.Y. 2025–2026 (1st & 2nd)

PROJECTS

BALIKBAYAN—Reintegration Decision Support and Beneficiary Monitoring Platform for OFWs, Capstone (Jun 2026–Present) | React, TypeScript, Tailwind CSS, Supabase

- Serve as a Frontend Developer on a four-person capstone team currently building a reintegration decision support and beneficiary monitoring platform for Overseas Filipino Workers (OFWs) in partnership with the Overseas Workers Welfare Administration (OWWA)
- Develop and implement frontend features and user interfaces, translating system requirements and user workflows into responsive interfaces.
- Collaborate with the development team using GitHub for version control, coordinating code contributions, and maintaining an organized workflow throughout the ongoing development process.

PENNYWISE—Budget Tracker Web Application (May 2026) | React, MongoDB, Tailwind CSS

- Frontend Developer on a five-person team building a React-based budget tracker that helps students and individuals record income and expenses, monitor spending, and stay on top of their overall budget.
- Implemented full CRUD transaction tracking, budget monitoring with balance calculation, expense categorization (food, transport, etc.), and a simple financial summary dashboard for the app's target users of students and individuals managing their finances.

RMITY Architectural Website System—Software Engineering Project (Jan–Jul 2026) | PHP Laravel, LAMP Stack, Tailwind CSS, MySQL

- Served as UI/UX Designer and Frontend Developer, and built and implemented both frontend and backend features using Laravel, ensuring a functional and responsive web system.
- Developed a centralized communication system for the architectural client, integrating the SMS API and Gmail API to streamline automated notifications and messaging workflows.
- Helped drive the system's architectural design and collaborated with a team using GitHub for version control, and participated in system planning, development, and testing, improving workflow coordination and reducing code conflicts across development cycles.

CERTIFICATIONS

- CCNA: Enterprise Networking, Security, and Automation — Cisco Networking Academy (Jan 2026)
- CCNA: Introduction to Networks — Cisco Networking Academy (Feb 2025)
- IT Fundamentals+ (ITF+) — CompTIA (May 2024)

LEADERSHIP & INVOLVEMENT

Photography & Documentation — UST SITE, [October 2023 - May 2024]

- Photographed and documented UST College of Information and Computing Sciences events, capturing key activities and moments for organizational records and event coverage.

TECHNICAL SKILLS

Programming Languages: HTML, CSS, TypeScript, JavaScript, C#, PHP, Java, Kotlin, PHP

Web Development: HTML, Next.js, React

Database Management: MySQL, MongoDB, Firebase

Frameworks & Libraries: React, Tailwind CSS, Bootstrap, Node.js, ASP.NET, Laravel

Development & Design Tools: Git & GitHub, Visual Studio Code, Android Studio, Vite, Figma, PlantUML, draw.io
